# ALWAYS A STEP AHEAD. EVEN IN REVERSE

- Reverse gear
- New headlights with LED DRL
- New gearbox cover
- New range of matte colours

With the same technical characteristics as the MP3 500 hpe Sport, the Sport Advanced has a unique feature that further enhances the practicality of the Piaggio MP3: it is the first three-wheeled scooter in the world with reverse gear included as standard equipment. This feature comes in handy for parking and in all of those urban situations where space is limited. Reverse is engaged using the dedicated control on the dashboard with the engine started and the vehicle stopped, reducing physical efforts and manoeuvring times. The headlights with DRL and LED technology, the transmission cover and the range of dedicated colour schemes with four matt shades, Grigio Elemento, Oro, Blu Nettuno and Nero Meteora are all elements exclusive to this model.
